

CHECKPRO **COMPLIANCE MANAGER**

**Proactive EAS management –
the key to success**

Proactive EAS management is essential for reducing shrink. By monitoring, measuring and managing an EAS program, retailers deter thieves, reducing shrink and increasing shelf availability, sales and profits. This in turn increases staff confidence and engagement with the EAS program ensuring a significant return on investment.

CheckPro Compliance Manager is an easy-to-use unit that is wall-mounted adjacent to the EAS antennas. It requires store staff to confirm reasons for EAS alarm activity. The captured data is then sent to a secure, Web-based reporting service for analysis and action.

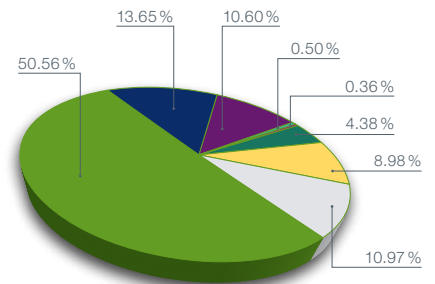

- Enables retailers to mine critical loss prevention data
- Increases the ROI on an EAS investment
- Removes the need for paper-based logs and their associated cost and logistical implications
- Deters thieves
- Improves the shopping experience

CHECKPRO COMPLIANCE MANAGER

The CheckPro Compliance Manager is a small, sleek unit designed to fit discreetly into any retail environment. It supports up to eight user-defined EAS alarm reason codes to meet individual business requirements. An intuitive and easy to use

touch screen reduces staff training and errors while increasing compliance.

This intelligent solution detects EAS system malfunctions and sends alerts to minimize system downtime.

- Test Alarm
- Attempted Theft
- Merchandise Recovered
- Unknown
- Run Away
- Failure to Deactivate
- Tag in Area
- Inbound Alarm
