

# Maintenance Services

F I N A N C I A L M A I N T E N A N C E S E R V I C E S

Checkpoint offers maintenance service for all of the products we sell, as well as full maintenance capabilities for any equipment you may have already installed. We cover electronic products nationwide. We also service physical security products in the southeastern United States now, with plans to expand nationwide.

## Maintenance services include:

- 24/7 service response available
- Highly qualified service technicians
- Technical capabilities spanning a broad spectrum of products
- Fully stocked service vehicles
- Branch stock back-up for quick response
- Local or 800 # dispatch
- Timely, accurate billing
- Customized reporting
- Competitive pricing
- Specified consultation
- Equipment relocation services

Operating from branch offices in Virginia, the Carolinas and Alabama and electronic coverage nationwide we're there to serve your needs quickly, 24/7, 365 days a year.

And our far reaching staff of highly qualified service technicians is equipped with today's most advanced telecommunications technology.

By simply calling Checkpoint, you can be certain of rapid response to your quick service needs notification.

Checkpoint service has developed expert technical capabilities that effectively span a broad spectrum including electronic, electromechanical and mechanical.

Checkpoint service vehicles are virtually a rolling repair shop and parts department. Carrying most of the necessary parts specific to a service territory.

Give us a call for a free survey and see how much you can save...
