

CHECKPRO AUDITOR™

*Simplifying the retail
audit process*

GET THE MOST FROM YOUR AUDIT PROGRAM WITH CHECKPRO AUDITOR™

In-store audits provide a vital and valuable insight into business performance; vital for corporate compliance and valuable in the fight against shrink. The problem is that manual, paper-based audits take up huge amounts of time and resources and are prone to error.

CheckPro Auditor™ from Checkpoint is the answer. It enables you to automate the entire auditing process across multiple locations – from data collection in-store, through to management and reporting at headquarters. Everything you currently do on paper, you can do more easily, faster and more accurately with CheckPro Auditor™.

What's more, CheckPro Auditor™ is highly versatile. You can carry out any type of audit – whether it is in-store or at headquarters. From stock control to health and safety practices, from straightforward yes/no questions to complex interrogations and calculations, CheckPro Auditor™ is the perfect solution.

Instant retail intelligence

This user-friendly solution does much more than overcome the difficulties and delays of paper-intensive audits. It adds value at every stage of the process, turning retail data into retail intelligence.

When an audit is submitted, the system instantly generates an action plan with all non-compliant answers and corrective actions for each. These plans can be e-mailed to the auditor, the store, or anyone else within or outside of the organization. Additionally, copies of the audit can be automatically sent to selected individuals within the business, to make them aware of the situation – the notifications can even be restricted to only failed audits, to reduce unnecessary e-mail.

Complete audits up to 70% faster

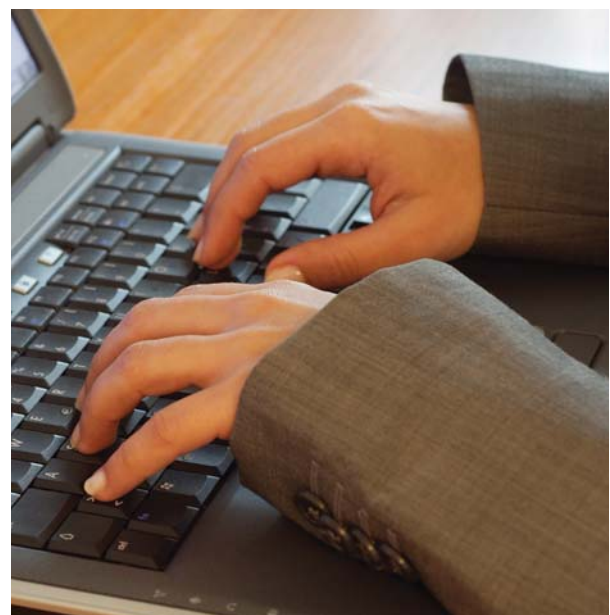

Developed for the unique demands of retail, CheckPro Auditor™ is expressly designed to help you achieve more in less time and at less cost.

The audit team collects data on-site via handheld, laptop or desktop devices and immediately uploads results to headquarters using the system's web-based reporting capability.

CheckPro Auditor™ is proven to be up to 70% faster than traditional paper-based audit methods. If you conduct 1,000 audits a year, for example, you could save up to 2,500 man-hours.

Paperless and cost-effective

With CheckPro Auditor™ you have an environmentally friendly solution that combines the discipline of industry best practices with flexibility to adapt to your particular needs. And because departments other than in-store auditing can benefit too, why not share the cost of ownership?

ACHIEVE REAL ADVANTAGES WITH REAL-TIME RESULTS

In today's fast-paced, competitive environment, success depends on spotting problems and taking early action to correct them.

CheckPro Auditor™ is all about capturing and processing in the here and now, so you have the best possible opportunity to identify and resolve difficulties before they damage business performance.

With such an instant and intuitive system at your fingertips you'll find it easier to drill down into results, compare and analyze audits across your chain and keep track of key performance indicators.

Audit Detail Report				
✔ Passed question ✖ Failed question ! Un-answered question ? Not Applicable				
Audit ID:	145885

Auditor Name:	Dag-Henning Eleven			
Auditor Email:	Dag-Henning.Eleven@eur.checkpoint.com			
Audit Date:	6/4/2008			
Question Number	Question	Range	Answer	Scored Points
EAS Deactivation Process				
1	1	Is the deactivation process conducted in an efficient manner, so that it does not slow down checkout throughput?	0-1 Points	Yes 1.0
2	2	Are all deactivators working correctly?	0-1 Points	No 0.0
3	3	Are the deactivation pads placed and operating in such a manner that the deactivation field is a reasonable height from the counter to enable easy tag deactivation?	0-1 Points	Yes 1.0
EAS Operational Mgmt				
4	4	Are associates aware of the EAS program?	0-1 Points	Yes 1.0
5	5	Is there an in-store tagging program in place?		Yes
6	6	If the store does any manual tagging, is the store buying Checkpoint tags (as opposed to generic tags that work with Checkpoint hardware)?	0-1 Points	Yes 1.0

Get a full and precise picture

In addition to all-round visibility, CheckPro Auditor™ brings consistency and accuracy to your audit program.

Everyone on the auditing team uses a universal system to process findings. Built-in controls prevent auditors from accidentally passing over or intentionally ignoring questions. And because it's a paperless system, illegibility and transcription problems become things of the past.

Full support to help you get started

CheckPro Auditor™ represents the very best and latest in mobile audit technology. To ensure you get the most from it and to help you get started, you'll have the support of a Checkpoint consultant – a professional with extensive practical retail auditing experience.

You'll be up and running in no time, with little or no extra burden on your IT function. And you'll automatically receive free service upgrades to further enhance your system's functionality, as and when they are made.

What are you waiting for?

Retailers of all sizes and sectors are choosing CheckPro Auditor™ to manage heavy audit workloads and tackle shrink. If you're serious about taking in-store auditing to the next level of efficiency, the question is not whether you should invest in CheckPro Auditor™, but can you afford not to?
