

INCIDENTREPORTER

*Understand how incidents
impact your business*

INFORM

With knowledge comes power

Stock loss, damage to property, burglary, theft, fraud. The total cost of these and other incidents across your retail operation is almost certainly greater than you think. To understand their full impact and prevent further losses you need hard facts. And you need them now, not weeks or months down the line.

IncidentReporter from Checkpoint is the smart answer. This web-based management solution enables you to capture incident information instantly and consistently, connecting it across your entire chain. It builds a complete picture of when and where different types of incidents occur and exactly how much they're costing you, giving you a frontline opportunity to improve business processes which leaves you free to focus on what you do best – selling.

Real information. Real results.

Everything you currently do on paper to manage incidents you can do more quickly and easily online with *IncidentReporter*.

Information is kept in a central database – users access the system in-store via your own intranet or help desk. Either way, it's easy for authorized staff in multiple locations to create records as new incidents happen, and update them as investigations progress.

MANAGE

Take control. Take action.

You'll never be in the dark about incidents again. Giving you a clear view of the nature, extent and cost of in-store events, *IncidentReporter* is your intelligent weapon for loss prevention.

Pinpoint potential trouble spots, prioritize security and capitalize on civil recovery opportunities. *IncidentReporter* gives you evidence and insight. Because you can measure, monitor and manage incidents more proactively, you target resources exactly when and where they're needed most.

Automatic e-mail alerts and escalation processes ensure that relevant management is instantly aware of serious or critical incidents, so that store employees receive the support they need.

Amazingly powerful yet extraordinarily easy to use

IncidentReporter delivers sophisticated functionality and features, but because it's based on familiar Windows technology, you don't have to be a computer wizard to get the best from it.

Customized to your operations

The system's built-in procedures and business processes ensure everyone captures information and follows up incidents in the same way, which leads to meaningful management reports and action plans. What's more, you can configure and expand *IncidentReporter* to fit your business.

ANALYZE

Understand the bigger picture

Take a closer look at *IncidentReporter* and you'll quickly appreciate just how much it can tell you about incidents across your operation. You can analyze a region over a particular period, compare losses by department or brand, evaluate security performance by store, get a snapshot of incidents in the current financial year and much more.

Advanced location and financial reporting

Management information – clearly presented in tables, charts and graphs – lets you see at a glance precisely where the problems are, so you can act quickly to keep the bottom line in good shape and outperform your rivals.

With *IncidentReporter's* full audit trail and clever reporting filters, you have the very best intelligence to safeguard your business against future losses.

IMPROVE

A clear focus lessens losses at all levels

Using *IncidentReporter* across your entire chain promotes a 'can-do' culture that tackles the root causes of loss head on. With easy, more direct ways to collect and share information, you encourage staff to think about the impact of incidents and take ownership of plans to improve performance.

It makes commercial sense

This live, accurate profile of incidents puts you on the winning end of one of retail's biggest battles.

You're in a stronger position to identify major issues, spot criminal trends and even predict and act upon problems before they escalate. *IncidentReporter's* high quality information enables you to plan and budget in-store improvements with added confidence.

Online access to the hard facts and advanced analytics mean you make the right decisions, and take the right actions at the right times.

Cut your losses and boost your profits... find out more about *IncidentReporter* today.
